

Uniform Loan Delivery Dataset Automation (ULDD)

ULDD exports and uploads done right, done fast.

The simple need for any lender is to not have people spending time performing ULDD exports/uploads. But a related source of loan defects and issues for post-closing is the uploading of inaccurate or incomplete ULDD data to the GSE portals. So quality control is critical to ensuring your ULDD automation provides real time-savings.

What makes Brimma BOTs Better?

At Brimma, we do more than create BOTs to automate your work. We work hard to make sure you know what you're getting and satisfied with the results. That's why Brimma backs-up its BOTs with a "if you don't like it, you don't pay" promise. And we provide a minimum of 30-days of "burn in" support for all of our BOTs.

Founded in 2016, by a former executive of Ellie Mae, IBM, and Palisades Technology Partners, Brimma was created to deliver innovative software solutions to mortgage lenders who need holistic solutions to the technology problems that have plagued the industry for decades. We know the only thing you hate more than your LOS is the idea of implementing a new LOS. We have felt your pain...and it is what drives us to build solutions that recognize that technology for mortgage lenders is unique.
