VALLIA

VALIDATE | AUTOMATE | PRIORITIZE | OPTIMIZE

MORTGAGE AUTOMATION UNLEASHED

Vallia is a collection of integrated components and applications that are meant to work seamlessly to provide you a modern, task-driven overlay to your Loan Origination System.

VISIT US

PROBLEMS FACED	HOW OUR PRODUCT HELPS?
Lack of centralized validations allows issues to slip through the cracks.	**Vallia VALIDATES** data before automations are triggered so as to reduce the loan processing time.
Systems require excessive human effort to complete recurring tasks.	**Vallia AUTOMATES** your manual tasks so you can focus on the tasks most in need of your skills.
No guidance is given to users as to what the most pressing tasks are across all of their assignments.	**Vallia PRIORITIZES** your work so you can focus on the most critical tasks first.
Systems are not organized the way you do work. Requires many more screens than it should.	**Vallia OPTIMIZES** your time by making every task more efficient.

VALLIA TARGET IMPROVEMENTS:

Zero missed lock extensions

Zero violations in initial disclosure content and timing

10%+ improved customer experience ratings throughout the loan life cycle

20-25%+ efficiency gain for loan setup and processing
